

Asbestos Awareness Training Workshop

1 Who Should Attend . . .

This workshop is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about liability and worker's compensation costs
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work
- ▶ Business owners who want to learn about compliance with MIOSHA

2 Why you need this Workshop . . .

- ▶ To reduce disabling injuries and illnesses to employees - and to ensure that every worker goes home safe and healthy every day.
- ▶ To reduce the high direct costs of work-related injuries, which grew to \$42.5 billion nationally in 2000, and indirect costs, which were estimated at an additional \$127 - \$212 billion in 2002. (*2003 Liberty Mutual Safety Index.*)
- ▶ To enhance your company's bottom line. A strong safety and health commitment not only protects workers, it also reduces worker's compensation costs, improves employee morale, and increases production and quality.

3 What You'll Learn . . .

Construction trades routinely renovate and demolish buildings that were built prior to 1981. These construction activities often result in contact with asbestos-containing materials. Asbestos Awareness Training is required annually for employees whose work activities may contact asbestos-containing materials (ACM) or presumed asbestos-containing materials (PACM), but do not disturb ACM or PACM during their work activities. This training consists of information regarding asbestos and its various uses and forms. Training also includes information on the health effects associated with asbestos exposure.

Agenda

- ▶ Asbestos: Its Various Forms & Uses
- ▶ Health Effects Associated with Asbestos Exposure
- ▶ Recognition & Locations of Asbestos Containing Building Materials
- ▶ Recognition of Damaged, Deteriorated or Delaminated Asbestos Containing Building Materials
- ▶ Person Who Will Carry Out General Responsibilities & Location of the Management Plan or Operations & Maintenance (O & M) Plan
- ▶ State & Federal Regulations

Facilitator

Michael graduated from Michigan State University in 1988 with a Bachelor of Science degree. Michael began his safety and health career in 1987 working as a Laboratory Technician for a local occupational and environmental consulting firm. Upon graduation, Michael advanced to Industrial Hygienist and obtained extensive experience in the construction industry serving as a state accredited AHERA building Inspector, Management Planner, Project Designer and Asbestos Supervisor.

Michael joined MIOSHA in 1994 as an Industrial Hygienist conducting enforcement activities for the Asbestos Program. Michael left the Asbestos Program in 2000 and began his current assignment as an Industrial Hygiene Consultant with the Consultation Education and Training Division.

In addition to Michael's current education and training duties, Michael is a CAOHC Certified Occupational Hearing Conservationist and has continued his education by attending OSHA training classes on a regular basis.

Mike Mealy
*Industrial Hygienist,
MIOSHA, CET Division*
